Drug Discovery in Africa Jun 30 2020 Drug discovery originating in Africa has the potential to provide significantly improved treatment of endemic diseases such as malaria, tuberculosis and HIV/AIDS. This book critically reviews the current status of drug

discovery research and development in Africa, for diseases that are a major threat to the health of people living in Africa. Compiled by leading African and international experts, this book presents the science and strategies of modern drug discovery. It explores how the use of natural products and traditional medicines can benefit from conventional drug discovery approaches, and proposes solutions to current technological, infrastructural, human resources, and economic challenges, which are presented when attempting to engage in full-scale drug discovery. Topics addressed are varied; from African medicinal plants to marine bioprospecting, pharmacogenetics and the use of nanotechnology. This book brings together for the first time a collection of strategies and techniques that need to be considered when developing drugs in an African setting. It is an unprecedented and truly international effort, highlighting the remarkable effort made so far in the area of drug discovery research by African scientists, and scientists from other parts of the world working on African health problems.

Forging Ahead, Falling Behind and Fighting Back Apr 21 2022 To what extent has the British economy declined compared to its competitors and what are the underlying reasons for this decline? Nicholas Crafts, one of the world's foremost economic historians, tackles these questions in a major new account of Britain's long-run economic performance. He argues that history matters in interpreting current economic performance, because the present is always conditioned by what went before. Bringing together ideas from economic growth theory and varieties of capitalism to endogenous growth and cliometrics, he reveals the microeconomic foundations of Britain's economic performance in terms of the impact of institutional arrangements and policy choices on productivity performance. The book traces Britain's path from the first Industrial Revolution and global economic primacy through to its subsequent long-term decline, the strengths and weaknesses of the Thatcherite response, and the improvement in relative economic performance that was sustained to the eve of the financial crisis.

Benigno, dernier compagnon du Che Sep 26 2022 En mars 1957, dans la Sierra Maestra, les troupes de Batista incendient la petite ferme de Dariel Alarcon Ramirez et assassinent Noémie, sa compagne âgée de seize ans, enceinte de sept mois. Pour la venger, le jeune garçon, rejoint les barbudos de Fidel Castro et de Che Guevara arrivés en décembre 1956 pour libérer Cuba de la tyrannie de Batista. Sous le nom de guerre de Benigno, il participe comme mitrailleur à la marche sur la Havane et sera de tous les combats. Capitaine à dix-neuf ans, il dirige l'entraînement des révolutionnaires latino-américains et africains. Il suit, au Congo puis en Bolivie, un Che qu'il fait revivre ici dans le quotidien de la guerrilla. Puis tout bascule : le Che est assassiné le 9 octobre 1967. Benigno, traqué par l'armée bolivienne, parvient à rallier Cuba. Devenu directeur des Ecoles spéciales, il continue les missions internationales : Bolivie, Angola, Pérou. Proche des premiers cercles du pouvoir, Benigno vit de l'intérieur l'évolution du régime, mais Cuba n'est plus " son " Cuba. Comme le Che, il part. Il vient en France et, au nom du légendaire Guerillero heroico, il témoigne désormais sans relâche, de leur idéal partagé de justice et d'humanité... Ce livre est comme un dernier combat, un adieu aux armes, où Benigno nous dit, qu'aujourd'hui, " seuls les mots doivent rester armés ".

L'identité économique de la France May 22 2022 La France n'aime pas le libre-échange. A gauche comme à droite, tous les sondages le montrent, les Français préfèrent le protectionnisme. L'ouverture au commerce international est source de malaise politique. L'identité économique de la France décrit l'émergence de cette culture protectionniste, entre la Révolution de 1789 et celle de 1848. Né au centre-droit de l'échiquier politique, le protectionnisme français séduit successivement la droite nationaliste, la gauche patriotique et les premiers mouvements socialistes. Le caractère démocratique et national des valeurs véhiculées par le discours protectionniste expliquent ce succès : égalité entre les producteurs, solidarité face à la concurrence internationale et rejet du modèle économique « anglais », industrialiste et inégalitaire. En Grande-Bretagne, libéralisme économique et libéralisme politique restent les côtés face et pile d'une même idéologie. En France, après le milieu du XIXe siècle, libéralisme économique et libéralisme politique se séparent pour souvent s'opposer. S'appuyant sur des sources originales – françaises, britanniques et allemandes –, L'identité économique de la France restitue l'intensité dramatique de ces débats qui ont contribué à forger le paysage idéologique français contemporain. L'histoire jette un éclairage saisissant sur la tension qui monte aujourd'hui entre la mondialisation économique et la culture démocratique française.

Transkulturalität nationaler Räume in Europa (18. bis 19. Jahrhundert). Übersetzungen, Kulturtransfer und

Vermittlungsinstanzen Feb 07 2021 Der Band bietet eine systematische Analyse des Kulturaustauschs und der Übersetzungsprozesse im europäischen Raum von der Mitte des 18. bis Anfang des 20. Jahrhunderts. Die Untersuchung der Zirkulation ausländischer Texte aus den Bereichen Belletristik, Literaturkritik und Theater dokumentiert das Ausmaß des Interesses und die Rezeptionsbereitschaft für ausländische Werke. In Fallstudien wird die Rolle der Akteure des Kulturtransfers herausgestellt – darunter Übersetzer und Kritiker sowie Institutionen der Vermittlung. Die Erforschung der Austauschbeziehungen hinterfragt die Formen, die Intensität und die Auswirkungen der kulturellen Internationalisierung in einer Periode zunehmender Nationalisierung und legt somit den Grundstein für eine europäische, transkulturelle Kulturgeschichte. This volume provides a systematic analysis of the cultural exchange and translation processes within the European area from the middle of the 18th through to the beginning of the 20th Century. The study of the circulation of foreign texts from the fields of fiction, literary criticism and theatre documents both the extent of people's interest in and receptiveness to foreign works. Case studies highlight the role of those who contributed to cultural transfer, including translators, critics and mediation institutions. The exploration of these exchange relationships questions the forms, the intensity and the effects of cultural internationalisation during a period of increasing nationalisation and thus lays the foundations for European transcultural cultural history.

La République des mallettes Jan 18 2022 La démocratie est-elle en train de tuer la démocratie, à bas bruit ? L'actualité a égrené depuis quinze ans des scandales politico-financiers sans que nous ne puissions en comprendre la logique, s'il devait même y en avoir une. Après plus d'un an d'enquête, au cours de laquelle de très nombreux acteurs, jusqu'au sommet de l'État, ont accepté de lui parler, à condition que cela soit souvent en « off », Pierre Péan met au jour bien des aspects passés inaperçus sur les activités dans les zones grises de l'État. Dans toutes ces affaires, un seul enjeu : constituer un « trésor de guerre », en vue de la campagne

présidentielle suivante. À chaque fois, il s'agit de tirer la manne des grands contrats civils ou militaires. Le durcissement de la législation sur le financement des partis a accouché d'un monstre : désormais, la pratique des rétrocommissions est devenue la règle d'un certain commerce international d'État. Cette « République des mallettes » a pris le pas sur l'État démocratique. Son fonctionnement et les décisions les plus stratégiques du pays semblent aiguillonnés, plutôt que par l'intérêt national, par le souci de perpétuer ce système et de le rendre le plus fluide possible par la constitution d'une oligarchie restreinte occupant les postes « stratégiques » : à la tête des grandes entreprises à capital public, à l'Élysée et dans les ministères régaliens. Une oligarchie pour qui l'argent est devenu roi. À travers l'incroyable itinéraire de l'un des « facilitateurs » de ce système, personnage au passé des plus troubles, Pierre Péan démonte une à une les pièces d'un mécanisme qui, si nous n'y prenons garde, finira par ronger le système démocratique français, comme c'est déjà le cas en Russie ou en Italie. Pierre Péan est enquêteur-écrivain. On lui doit notamment *Affaires africaines* (1983), *Une jeunesse française* (1994) et *Le Monde selon K.* (2008). Il a publié dernièrement aux éditions Mille et une nuits *Carnages*.

Beyond Descriptive Translation Studies Nov 16 2021 To go “beyond” the work of a leading intellectual is rarely an unambiguous tribute. However, when Gideon Toury founded Descriptive Translation Studies as a research-based discipline, he laid down precisely that intellectual challenge: not just to describe translation, but to explain it through reference to wider relations. That call offers at once a common base, an open and multidirectional ambition, and many good reasons for unambiguous tribute. The authors brought together in this volume include key players in Translation Studies who have responded to Toury's challenge in one way or another. Their diverse contributions address issues such as the sociology of translators, contemporary changes in intercultural relations, the fundamental problem of defining translations, the nature of explanation, and case studies including pseudotranslation in Renaissance Italy, Sherlock Holmes in Turkey, and the coffee-and-sugar economy in Brazil. All acknowledge Translation Studies as a research-based space for conceptual coherence and creativity; all seek to explain as well as describe. In this sense, we believe

that Tourny's call has been answered beyond expectations.

Bone and Joint Disorders of the Foot and Ankle Sep 14 2021 This book presents the essential anatomic and radiological data, discussing new and refined techniques of imaging such that readers may rely on their interpretation. The chapters on pathology are approached in a clinical context, accompanied by numerous diagrams and photographs, while the references, both classical and recent, are profuse. The result is a complete review of the subject, of interest to both the specialist and the non-specialist.

The Languages and Linguistics of Africa Apr 09 2021 This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa, the continent with the largest number of languages in the world. It covers the major domains of linguistics, offering both a representative picture of Africa's linguistic landscape as well as new and at times unconventional perspectives. The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other. This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics.

The Forests of the Congo Basin Jan 06 2021 The 2010 State of the Forest report (SOF) benefited from financial support from the European Union, the United States, Germany, France and UNESCO. It represents the collaborative effort of over 100 individuals from a diversity of institutions and the forestry administrations of the Central African countries. The SOF process began with the selection and definition of indicators relevant to monitoring the state of forests in Central Africa. The indicators are structured around three thematic areas: (i) forest cover; (ii) management of production forests; and (iii) conservation and biodiversity. They are presented in a hierarchical structure at the regional, national and management unit (i.e. logging concessions and protected areas) levels. The indicators were vetted by a representative panel of stakeholders of forest management in Central Africa. The indicators are used to guide an annual data collection process carried out between April and August by national groups of four to ten individuals working within the forestry administrations. The data reported on in the 2010 SOF were primarily collected in 2009 and 2010. Results were validated in national workshops attended by government officials as well as representatives of environmental NGOs, the private sector and development projects. The data provided an important basis for the authors of the 11 chapters of the 2010 SOF, which were under the coordination of a scientific committee of international renown. A final workshop was held 29-30 March, 2011 in Douala to review a draft report. Following amendments based on comments from a wide audience of experts the final layout was completed.

Indonesia's Foreign Policy and Grand Strategy in the 21st Century Oct 27 2022 This book examines the changes in Indonesian foreign policy during the 21st century as it seeks to position itself as a great power in the Indo-Pacific region. The rise of 21st-century Indonesia is becoming a permanent fixture in both the domestic and global discourses. Though there has been an increasing level of discussion on Indonesia's emerging power status, there has been little discussion on how the country is debating and signalling its new-found status. This book combines the insights of both neo-classical realism and social identity theory to discuss a reset in an emerging Indonesia's foreign policy during the 21st century while emphasizing domestic drivers and constraints of its international behaviour. There are three key organizing components of the book – emerging power, status signalling and the Indo-Pacific region. The Indo-Pacific region constitutes a spatial framing of the book; the emerging power provides an analytical category to explain Indonesia's changing international status; and status signalling explains multiple facets of international behaviour through which the country is projecting its new status. Though leaders are adding different styles and characteristics to the rising Indonesia narrative, there are a few unmistakable overarching trends that highlight an increasing correlation between the country's rising power and growing ambition in international behaviour. This book is built around four key signalling strategies of Indonesia as an emerging power – expanded regional canvas, power projection, leadership projection, and quest for great power parity. They represent Indonesia's growing desire for a status-consistent behaviour, its response to the prevailing strategic uncertainty in the Indo-Pacific region and its attempt to advance its strategic interests. This book will be of much interest to students of South-East Asian politics, strategic studies, international diplomacy, security studies and IR in general.
